

Thoria

Minecraft Server Administrator & Media Manager

Summary

Experienced Minecraft server administrator and media manager with a background running and moderating large-scale Minecraft networks. Skilled in chat and anticheat moderation, staff leadership, ticket workflows, bug documentation, community communication, and creator/media management. Comfortable leading teams, working with developers, and keeping communities healthy and engaged.

Key Skills

- Chat moderation, punishment auditing, and filter-bypass detection
- Unfair-advantage moderation including manual screenshares and evidence logging
- Ticket handling across appeals, player reports, bug reports, general inquiries, and media applications
- Staff leadership, onboarding, and community communication
- Creator/media management and activity tracking
- Bug documentation and developer coordination
- Internal tooling with Python and JavaScript

Notable Experience

ArchMC Network

Served as part of the moderation and media team for a major Eaglercraft-based network. Handled chat moderation using automated bad-actor detection, audited punishments and appeals, and enforced chat-filter compliance. Investigated unfair-advantage cases using Polar anticheat and manual screenshares, logging evidence for every action. Managed tickets across appeals, player reports, bug reports, general inquiries, and media applications. Coordinated with developers on bug documentation and community feedback. Stayed actively involved in community communication and creator/media management.

ArchMC Tier Tests

One of three managers for a Minecraft testing community. Approved and denied tester requests, moderated Discord chat, and implemented changes based on community feedback.

PurpleMC

Head Administrator on an inactive network owned by Keonhaplayz.

Rift SMP

Founding Administrator for a content-creator SMP. Ran weekly events for six weeks through the season.

Other SMP & Server Roles

- Basic SMP — Administrative member
- Encompass / Flux SMP — Staff member
